

The Village of Sherman

is inviting investors, realtors, and developers,

to discuss leveraging opportunities for businesses and the greater Sherman community. The team at Barton & Loguidice is assisting the Village in applying for the **NY Forward** grant of up to \$4.5m in economic and community development funding for building improvements, business development, placemaking strategies, gateways and green infrastructure for implementation and revitalization of downtown Sherman to attract businesses, residents, and visitors. The Village is continually working toward providing a higher quality of living for residents by exploring and capitalizing on the rich cultural, historic, natural, and agricultural assets of the Village, by increasing access to the trail systems, affordable childcare, new retail spaces to diversify the downtown's current offerings, and establishing an anchor business.
